## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-30 allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest the invention claimed by applicant. In particular, the prior art fails to disclose an anti-siphon valve with a spherical housing with an inlet and outlet, and a free-floating ball-valve with an off-center ferromagnetic weight and a circumferential channel, along with the other steps and limitations of the claims.

The best prior art of record, US 3,883,113 to Kolb and US 3,206,160 to Bennett fail to suggest the combination claimed by applicant. Kolb discloses a free-floating ball valve with a circumferential channel 52, but does not disclose any magnetic components. Bennett discloses a free-floating magnetically controlled valve, but fails to disclose that the magnetic components are off-center, nor does he disclose that the ball valve features a circumferential channel. Therefore, the instant invention is patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Drawings***

3. The drawings were received on 17 March 2006. These drawings are accepted.
